

Adan Fabricio Alvarado España

Graphic Designer / Systems Engineering Student

I am a graphic designer with experience in digital marketing agencies and the production of more than 4,500 visual assets for campaigns and social media. I am currently 86% through a degree in Systems Engineering, combining creativity and technical thinking to develop functional, results-oriented visual solutions. I have successfully balanced university studies and full-time work, demonstrating strong organizational skills, discipline, and the ability to learn quickly. Accustomed to high-demand environments, I work efficiently, with organization and strategic focus, integrating creativity and technical foundations for functional digital solutions.
